

ARMANDO RODRIGUEZ

Senior Cloud Engineer & Solutions Architect | Active Secret Clearance

Richmond, VA • (956) 223-8863 • armando@armandorodriguez.cloud • [linkedin.com/in/armandorodriguez-sys](https://www.linkedin.com/in/armandorodriguez-sys)

PROFESSIONAL SUMMARY

Senior Azure Cloud and Infrastructure Engineer with 12 years architecting, deploying, and supporting enterprise infrastructure end-to-end—from system and server components to full network stacks—across on-prem, hybrid, and Azure environments powering classified DoD missions. Equally strong building and deploying applications, running virtualization platforms, and administering the Microsoft 365 suite. Above all, I'm a solutions builder and problem solver: I design what the mission needs, deploy it cleanly, and untangle the issues others get stuck on. Active Secret clearance; AZ-305 and AZ-104 certified.

CORE COMPETENCIES

- Infrastructure Architecture & Deployment (Systems, Servers, Storage)
- Application Deployment & Lifecycle Management
- Azure Cloud Infrastructure (IaaS, PaaS, Networking, Storage)
- Identity & Access Management (Entra ID, Active Directory, ADFS)
- Containerized Workloads (Docker, Linux, PostgreSQL)
- Automation & Scripting (PowerShell, Microsoft Graph API, Python)
- Network Infrastructure & Firewalls (Cisco, Palo Alto, Cloudflare)
- Virtualization (VMware vSphere / vCenter / vSAN, Hyper-V)
- Microsoft 365 Suite (Exchange, SharePoint, Teams, Intune)
- Hybrid Cloud Migration & Disaster Recovery (ASR, Backup)
- Endpoint Management & Compliance (Intune, MECM, STIG/SCAP)
- Solutions Architecture, Monitoring & Reporting (Power BI, Grafana)

PROFESSIONAL EXPERIENCE

Senior Azure Cloud Engineer

08/2025 – Present

AeroVironment • Remote

- Architected and stood up the enterprise-scale Azure infrastructure underpinning an entire classified program—compute, networking, storage, and automation runbooks engineered to stay resilient under sustained mission load.
- Hold Global Administrator across Microsoft 365, Azure, and Entra ID—single-handedly owning tenant-wide security policy, identity governance, RBAC, and enterprise configuration for the full classified program environment.
- Engineered cloud-native automation pipelines on Azure Automation and the Microsoft Graph API that eliminated manual workflows outright and pushed real-time reporting straight to SharePoint and senior leadership.
- Built advanced threat-detection pipelines in Microsoft Sentinel—fusing Cloudflare gateway telemetry with Entra ID authentication logs to expose anomalous foreign-access patterns and drive insider-threat monitoring.
- Architected and solely own a containerized Linux application stack—Grafana, Element, Wiki.js, Zammad, MobSF, and custom bots—running the full database lifecycle, service reliability, and infrastructure continuity end-to-end.
- Designed and shipped executive-facing Power BI and Grafana dashboards delivering real-time visibility into unit readiness, device health, and program activity directly to command leadership.
- Own Android Enterprise MDM in Intune across the tactical device fleet—driving full app lifecycle, dynamic enrollment, compliance enforcement, and line-of-business app distribution to field personnel.

- Run TAK Server infrastructure powering battlefield situational awareness—CoreConfig, PKI certificate lifecycle, PostgreSQL databases, and distributed service health across a large-scale tactical network.
- Configure and defend Cloudflare firewall and networking; drive vendor evaluations and technical solution decisions, turning complex operational requirements into procurement calls and technology roadmaps.

Sr. Systems Architect / Engineer

08/2024 – 08/2025

Leidos • Ft. Meade, MD

- Led infrastructure and identity migrations for 10+ DoD agencies, supporting 45,000+ users and 25,000+ endpoints across a multi-domain environment.
- Designed and executed hybrid cloud architectures on Microsoft Azure, including Azure AD integration, IaaS, Azure Site Recovery, and Zero Trust-aligned security controls.
- Built Infrastructure as Code solutions with Terraform and Azure Bicep to provision and manage Azure resources, enabling consistent, repeatable deployments across dev/test/prod.
- Managed enterprise deployment of Microsoft 365, MECM, and Intune—enabling secure collaboration, automated patching, and endpoint compliance.
- Authored migration runbooks, EIPs, BOMs, and deployment scripts to ensure smooth transitions and operational continuity.

Senior Windows Systems Engineer

09/2023 – 08/2024

ECS Federal • Arlington, VA

- Designed and managed a multi-site Active Directory environment—site topology, replication, and domain architecture for the PSNet and EAE networks.
- Led deployment of ADFS, GPOs, and identity solutions, integrating Azure AD for hybrid identity and access management.
- Engineered end-to-end infrastructure across on-prem and Azure, combining physical/virtual servers, storage, and networking to meet enterprise performance goals.
- Built a pre-production lab replicating production for Azure and on-prem workloads, enabling safe testing and validation of system changes.
- Streamlined VMware vSphere/vCenter environments, ensuring tight Active Directory integration and readiness for Azure hybrid cloud deployments.

Senior Systems Engineer Supervisor

05/2022 – 09/2023

Bexar County Information Technology • San Antonio, TX

- Led and mentored a team of six systems engineers, developing tailored training in VMware vSphere, Microsoft Azure, and PowerShell automation.
- Architected and managed hybrid infrastructure across two on-prem data centers and Microsoft Azure, supporting 500+ servers, 6,000+ users, and Dell EMC / NetApp SAN/NAS storage.
- Oversaw VMware virtualization environments, ensuring seamless integration with Active Directory and hybrid cloud workloads.
- Drove Agile delivery through stand-ups, one-on-ones, and sprint planning while enforcing ITIL best practices across daily IT operations.

Systems Engineer III

10/2021 – 05/2022

General Datatech • San Antonio, TX

- Engineered VMware vSphere and ESXi with HA, DRS, vMotion, and core virtualization services.
- Managed multi-domain Active Directory and AD DS services—Domain Controllers, PKI, file servers, SCCM, and WSUS.
- Designed and supported Azure infrastructure (VMs, storage, networking) for secure, scalable cloud deployments.
- Ensured enterprise compliance via SCAP scans and DoD STIG enforcement, improving security posture across Azure and on-prem environments.

Systems Administrator III

03/2020 – 07/2021

Apex Systems • San Antonio, TX

- Provisioned and administered Azure infrastructure—VMs, storage accounts, virtual networks, and Azure AD—to support hybrid and cloud-native solutions.
- Configured and managed VMware vSphere/ESXi hosts supporting high-availability on-prem workloads.
- Supported enterprise adoption of Microsoft 365 (Exchange Online, SharePoint, Teams, Intune) for secure collaboration and mobility.
- Hardened security by applying STIGs and conditional access policies across Azure and Microsoft 365.

Lead Systems Engineer / Sergeant

05/2015 – 05/2019

United States Marine Corps • Marine Corps Base Hawaii

- Led a team of 16 engineers, administrators, and support staff to deploy a fully functional client-server environment.
- Oversaw deployment of Active Directory, virtualization, PKI, Exchange, and core infrastructure services for 900+ users.
- Authored a cybersecurity binder covering continuity of operations, disaster recovery, and security policy; served as IT systems SME, often acting as IT manager reporting to the communications officer.

Earlier Experience: Computer Technician, TigerDirect (2014–2015) • IT Consultant, CompuPlanet (2014)

EDUCATION

B.S., Information Technology — Western Governors University, UT

2021 – 2024

A.S., Physics — South Texas College, TX

2010 – 2014

CERTIFICATIONS

- | | |
|--|---|
| ▪ Microsoft Certified: Azure Solutions Architect Expert (AZ-305) | ▪ Microsoft Certified: Azure Administrator Associate (AZ-104) |
| ▪ Cisco Certified Network Associate (CCNA) | ▪ CompTIA Security+ (Sec+) |
| ▪ CompTIA Network+ (Net+) | ▪ CompTIA Project+ (Proj+) |
| ▪ ITIL v4 Foundation | ▪ AWS Certified Cloud Practitioner |
| ▪ LPI Linux Essentials | |
